Cold Chain Solutions

Advanced Engineering

Our engineering leverages top-grade, thermally insulated materials to consistently uphold the ideal temperature conditions.

Warehouse Automation

By integrating advanced systems like AS/RS and 4-way pallet shuttles, we are able to streamline your automation processes.

Professional Consultancy

Our expert team provides comprehensive advice and guidance on all aspects of cold storage, cold chain logistics and automation.

Optimal Management

We customize cold chain processes for optimal product quality and freshness throughout the entire supply chain.

Diverse Industries

With adjustable insulation and cooling systems, we can serve various industries like food, beverage, and pharmaceutical.

Customized Design

We design and build state-of-the-art cold storage facilities that maximize space and efficiency.

Chinachem Group and ESR have appointed BPS Global as the logistics and cold chain consultant for their grade-A cold storage and logistics centre in Kwai Chung.

HK's Largest & Most Advanced Cold Storage Facility

Groundbreaking Ceremony

Cold Storage Area 138,000 m²

With over 30 years of professional experience in logistics technology management

BPS Global was appointed by ESR Group and Chinachem Group as the logistics and cold chain consultant for their new grade-A cold storage and logistics centre in Kwai Chung, providing professional logistics design and consultancy solutions for the project.

The total area of the cold storage is around 138,000 square metres. It adopts automated technologies and green elements including the rainwater recycling system and has obtained multiple green building certifications. The project also utilizes the local transportation network to reach business districts.
